MEMORANDUM FOR THE DIRECTOR

SUBJECT: IAC Meeting, October 28th

1. The only item scheduled for the IAC meeting this week is the proposed DCI Directive 3/3 on Scientific Intelligence, as amended October 6th, circulated with Memorandum of October 10th requesting the IAC members to vote on this proposal at the next meeting and if they could not accept it, to bring with them their dissents.

2. As you will recall, this was originally circulated in July after several Standing Committee meetings during the Spring. A re-write of the July proposal was circulated August 22nd because so many comments had been received. All members of the IAC except the Army accepted the August 22nd re-write.

3. Accordingly, rather than getting additional comments, the IAC members were requested on October 10th to vote on the amended proposal of October 6th at the forthcoming meeting. It is understood that the Army is willing to accept this amended proposal and it is believed all others will also.

4. At the meeting (if it goes as expeditiously as we hope) ^{will you} ask the members to appoint promptly their scientific representatives as mentioned in paragraph 1 of the proposal so that we may get on with this work.

5. As soon as the Scientific Intelligence Committee gets going, it should take up as a matter of priority medical intelligence, Research and Development Board intelligence, and JNEIC reports as all of those subjects have been stymied by the delays in getting any action on this over-all Scientific Intelligence Committee.

5. Attached is a copy for your use at the meeting if necessary of the proposed DCI as amended October 6th.

Encl.
